**ANGLEC CELEBRATING
20 YEARS OF SERVICE**

Ten Application Tips

1. Apply in a timely manner (three months prior to connection need).
2. Pay estimated connection cost as soon as available (approximately 20 days after application date).
3. Ensure accurate location details are provided (meter location, pole location and the name of the closest neighbor with electricity).
4. Contact information (telephone, email and all other pertinent information).
5. Notify neighbors and seek to obtain permission to access roads if necessary.
6. Provide electrician contact information.
7. Provide Anglec with a copy of parcel map from Lands & Survey identifying the specific parcel of land.
8. Provide Anglec with the building permit information (from Planning Department).
9. Ensure Anglec receives your electrical inspection certificate (at least 15 days prior to the needed connection date).
10. The average new connection will take approximately 30-90 days.

Conservation Tips

- Use energy saving bulbs instead of incandescent (regular) bulbs.
- Turn TV, DVD and fans off when not in use
- Open refrigerator / freezer doors as few times as possible and ensure that seals and coils are clean and are in good working condition.
- When hand washing dishes avoid running hot water .
- Install timers on water heaters.
- Install low flow shower heads that will save on energy and water use.

A few tips for Landlords

In order to ensure that tenants receive their electrical bills on time and avoid a 2% late payment charge and possible disconnection, please take note of the following:

- Place the bill in care of the tenant with the tenants address.
- Ensure that the tenant pay a deposit with Anglec and change the account name from the owner's name to the tenant's name. The deposit will yield a 3% annual return upon exiting the residence provided that all Anglec bills are paid in full. This will limit the owner/landlord's liability for any outstanding bills that a tenant might not have paid.

Home Owners Energy Guide (Includes GOA Levy)

Appliance	Watts	*Hours (Monthly Average)	Kwh (Units)	Cost monthly \$1.05 / unit
